

## Gad Perry Bio:

Gad Perry is currently assistant professor of Conservation Biology at Texas Tech University. His research centers on ecology in the broadest sense, with a large emphasis on conservation issues and the increasingly profound impacts of humans on the environment. Much of his work is carried out on reptiles and amphibians, and invasive species are a common focus. He is an associate editor for the *Journal of Herpetology*, Section Editor for *Applied Herpetology*, and a member of the Invasive Species and Iguana Specialist Groups of the IUCN.
